Candy Beauty Toothbrush

キャンディー
Candy

Massage cheeks from inside the mouth while brushing!

Everyday brushing lifts up your face!

KEY POINT

You can massage the intraoral without difficulty while cleaning your teeth.

1 Salivary Glands Massage

Stimulating salivary glands which are located in each cheek help increase saliva secretion.

The functions of saliva

- Strengthen the immune system, anti-aging action
- Prevention of tooth decay, periodontal disease or bad breath
- Digestive action
- Taste perception action
- Effective in dry mouth (effective in xerostomia)

2 Masseter muscle massage

Massaging and loosening the masseter muscle are expected to have the effect of preventing migraine, over-clenched or teeth grinding. They also help prevent stiff neck / shoulders, temporomandibular joint disorder or mouth-breathing.

3 Nasolabial folds massage

Exercising strengthen of mouth muscle expect the beauty effect on facial swelling / distortion, nasolabial folds and other signs of aging.

4 Mouth opening exercise

The ball attached to the toothbrush helps provide a training of mouth-opening and an exercise of orbicularis oris muscle. It also helps increase blood flow to the brain.

5 Lip massage

Massaging the lip line from inside of your mouth makes your lips soft and plump.

6 Ultra fine bristles

Ultra fine bristles can reach deep into periodontal pockets between and perfectly remove stains and plaques which is one of the causes of periodontal disease.

Hardness: Soft / Medium
Color: ● ● ● ●

Toothbrush for children

Dentfine

The toothbrush is designed to be safe for children to prevent choking in the event of slip or fall.

Soft and flexible neck bends!

Small head & Round tip bristles

- The small head reaches into hard-to-reach corners of the molars.
- Soft round tip bristles for gentle cleaning.

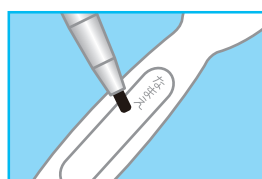

Dentist-recommended safe design

- The toothbrush has wide handle to prevent the head from inserting deeply into the mouth and is designed not to reach the throat easily in the event of slip or fall.
- The rubber coated neck doesn't cause damage to the teeth if it is chewed.
- The toothbrush was developed to help reduce concerns of "It's dangerous if slip or fall accidents happen!"

Wide handle

- The thick handle provides a stronger grip for young children.
- Because it is wide and enough space, you can write your name on the back of toothbrush.

Hardness: Medium
Color: ● ● ● ●

For ages: 1.5~6
Made in Japan

健康宣言

Jewelry Ion Jr.

The toothbrush only requires water!

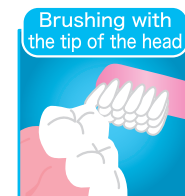

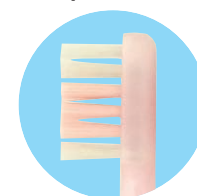

It comes with name stickers

Design for kids

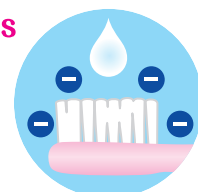

Small head is easy to reach every hard-to-reach area

- Compact head is designed for small mouth.
- Using the tip or the base of the head depending on the parts of your teeth is effective.

Nylon that emits negative ions

Nylon bristles contain natural ores. Water and friction produce electrolysis and emits stable negative ions permanently. Ions help remove bad breath and plaques and improve blood circulation of your gums.

Antibacterial handles

- Resins that has antibacterial and mold resistance effects help keep the toothbrush clean.
- Handles are designed for small hands.

Hardness: Medium
